

Name: _____

Date: _____

Species Recommendation Form

Develop a model of the recommended species. Include and label all structures and function at key points in its life cycle. Title the model with the common and scientific names.

Connections to the environment: Describe how the structure and function of this cotton species connect with the natural environment of the farmer's land. Refer to your model in the connections you make.

Other recommendations for Maximizing Harvest Success

Provide evidence from information gathered to support these additional recommendations.
